

QUALITY ANALYTICAL TESTING FOR ACTIVE PHARMACEUTICAL INGREDIENTS

Painting a Complete Picture of Your API

ROUTINE TESTING

We provide excellent quality testing while meeting your deadlines.

We make your priorities our priorities.

We provide complete data packets for your review and approval.

METHOD DEVELOPMENT & VALIDATION PHASE APPROPRIATE

Our chemists have years of experience developing analytical methods for small molecules.

We understand the requirements for each phase and design our validation protocols to adhere to the ICH guidelines.

We will work closely with your team to ensure that your methods are ready to generate the data needed to make your filing a success.

Instrumentation

HPLC (DAD)
GC
Karl Fischer
(Coulometric, Volumetric, Oven)
LC/MS
NMR

Testing

Forced Degradation
Compendial (USP & EP)
Solubility
Method Development
Validation

Equipment

pH Meter
Vacuum Oven
Photostability Chamber
Micro Balance
Analytical Balance
